

# Clean Hands Save Lives

Before and after patient contact/ personal hygiene

- Remove rings, bracelets, watches
- Wet hands under running water
- Apply antimicrobial cleanser
- Work into lather for at least 10 to 15 seconds
- Scrub fingers, palms, backs of hands, wrists, forearms; clean under nails
- Rinse hands under running water
- Use paper towels to blot dry; use same towel to turn off faucets, then discard

**Betadine®**  
**Surgical Scrub**  
(povidone-iodine, 7.5%)

**Betasept®**  
**Surgical Scrub**  
(chlorhexidine gluconate 4%)

To kill bacteria that infect patients—
